The kids absolutely love all of these books. They have been great for us on road trips. Our kids,

ages 8 & 9 are just totally immersed in these books when they look at them. They are fun and educational as well. They have a blast reading the questions to us and answering them for us if we get them wrong. The book is easy for kids to use. These books are probably geared more for ages 10-12, but even with our kids on the younger side, they still love them and will be going thru them for years to come.

The students love these Quiz Whiz books. They not only get them into reading but they enjoy showing each other odd facts. Great communication books!

The National Geographic line of kids' books always pleases our family. My bright 7 year old loves this book and tries to "stump" Mom and Dad with the trivia questions. There are different sections, which focus on a specific area, and the questions provide answer choices (a,b,c or d) with the answers in the back of the book. With the different areas of focus, he learns several facts about each topic. And he is becoming accustomed to the multiple choice answer format found in school. It is great for a car ride to encourage family interaction and provide an alternative to video games. My son learns while having fun, which is an A+ in my book. (This is the same review that I posted for the National Geographic Quiz Whiz book 1 but applies the same).

Wonderful books for anyone looking to have fun while expanding their knowledge.

my both kids love these books. they are not so well made- meaning if you read and take these books with you in the car then the pages seems to rip off. i have fixed other similar books already with tape. that said the content of the book is really great.

Despite my best attempts to find family dinner games that everyone enjoyed and that didn't lead to disagreements I had struggled until...we discovered Volume 1 of this book! We take turns having someone choose and read and quiz and have lots of fun discussing our answers - plus we learn new information.

The book was a gift for my young niece

My kids enjoy this greatly. Challenging them to think and remember trivia always add to education in a fun way.
