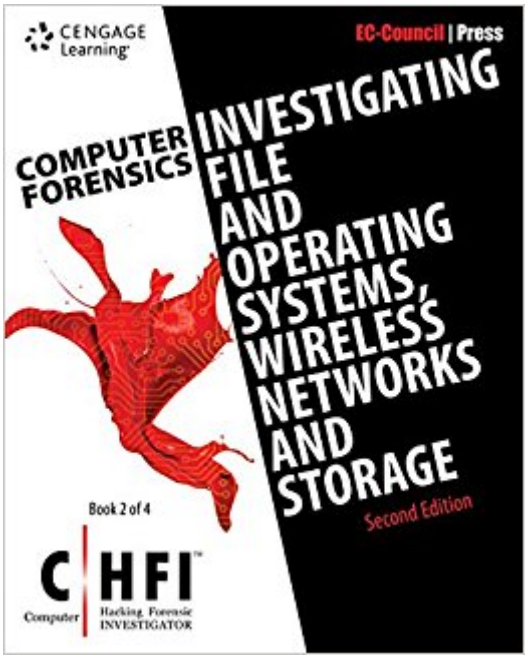
Computer Forensics: Investigating File And Operating Systems, Wireless Networks, And Storage (CHFI), 2nd Edition (Computer Hacking Forensic Investigator)



Synopsis

The Computer Forensic Series by EC-Council provides the knowledge and skills to identify, track, and prosecute the cyber-criminal. The series is comprised of four books covering a broad base of topics in Computer Hacking Forensic Investigation, designed to expose the reader to the process of detecting attacks and collecting evidence in a forensically sound manner with the intent to report crime and prevent future attacks. Learners are introduced to advanced techniques in computer investigation and analysis with interest in generating potential legal evidence. In full, this and the other three books provide preparation to identify evidence in computer related crime and abuse cases as well as track the intrusive hacker's path through a client system. The series and accompanying labs help prepare the security student or professional to profile an intruder's footprint and gather all necessary information and evidence to support prosecution in a court of law. File and Operating Systems, Wireless Networks, and Storage provides a basic understanding of file systems, storage and digital media devices. Boot processes, Windows and Linux Forensics and application of password crackers are all discussed.

Book Information

Series: Computer Hacking Forensic Investigator

Paperback: 236 pages

Publisher: Course Technology; 2 edition (April 19, 2016)

Language: English

ISBN-10: 1305883489

ISBN-13: 978-1305883482

Product Dimensions: 7.2 x 0.5 x 9 inches

Shipping Weight: 12 ounces (View shipping rates and policies)

Computer Forensics: Investigating File and Operating Systems, Wireless Networks, and Storage

View larger View larger View larger View larger Illustrations and

screen shots offer visualization and clarification of important tools and tactics used by hackers. What If? cases present short scenarios followed by questions that challenge you to arrive at a solution. State-of-the-art tools of the forensic trade are highlighted, including software, hardware and specialized techniques. You will investigate network traffic, wireless attacks, web attacks, DoS attacks, internet crimes, e-mail crimes, corporate espionage, copyright infringement and more!

#BeUnstoppable with MindTap! View larger View larger View larger View larger Perform better with MindTap. The more time spent in MindTap, the better the results. Using MindTap throughout your course matters. Students using apps perform better on assignments.

Everything in One Place with MindTap View larger View larger View larger View larger Tap into engagement. MindTap empowers you to produce your best workÃƒÂ¢Ã â ¬Ã â •consistently. MindTap shows where you stand at all timesÃƒÂ¢Ã â ¬Ã â •both individually and compared to the highest performers in class. MindTap is designed to help you master the material. Interactive videos, animations, and activities create a learning path designed by your instructor to guide you through the course and focus on whatÃƒÂ¢Ã â ¬Ã â„¢s important. MindTap is mobile. The new MindTap Mobile App provides the mobility and flexibility for you to make any time study time. MindTap helps you stay organized and efficient. MindTap gives you the study tools to master the material.

The International Council of E-Commerce Consultants (EC-Council) is a member-based organization that certifies individuals in various e-business and security skills. It is the owner and developer of the world famous Certified Ethical Hacker course, Computer Hacking Forensics Investigator program, License Penetration Tester program and various other programs offered in over 60 countries around the globe. These certifications are recognized worldwide and have received endorsements from various government agencies including the US Federal Government via the Montgomery GI Bill, and the US Government National Security Agency (NSA) and the Committee on National Security Systems (CNSS) certifying EC-Council Network Security Administrator (ENSA) program for meeting the 4011 training standard for information security professionals.
