Digital Multiplication Flash Cards In Color (Ordered And Shuffled 1-9)

Synopsis

This eBook includes 162 digital multiplication flash cards in color (where color is available). Each flash card is decorated with smiley faces and looks just like the flash cards depicted on the thumbnail image for the cover of this eBook. The first set of 81 flash cards has the problems 1x1 thru 9x9 in order. The first half of this eBook is designed for kids who are still memorizing their times tables. The second set of 81 flash cards has the problems 1x1 thru 9x9 shuffled. The second half of this eBook is designed for kids who have tried to memorize their times tables, and who need to test their mastery of it. Each flash card appears as its own picture on its own page. All of the flash cards come in pairs: First comes the problem flash card, followed by the corresponding answer flash card. The answer flash card reminds you what the problem was. So first you see the problem, and then you check your answer immediately. This eBook reads like a book. It is not a program or a game. It does not use a random number generator. The flash cards do look like ordinary flashcards (and they are in color and are decorated with smiley faces). The first half of this eBook has the flash cards in order to help memorize the times tables. The second half are shuffled to help test how well the times tables have been memorized. The shuffled cards will always appear in the same order.

Customer Reviews

Great for your child to play and learn. Perfect reminder to keep them on track during breaks of the school year. Helped my youngest get through the learning without the suffering - kept her playing....

Great for my students

Awesome tool for my 3rd grade kid!

This flash card game is awesome, you mothers who have kids that are in 3rd grade and up this is perfect. It starts out easy, then it gets harder and harder.

This has been great for teaching my kids their times tables and since it's on my phone we can do it anywhere! :)

I was disappointed that these did not fill the entire screen. They only filled about 1/3 of the screen. It is not a game app--so, be aware that they go in order from beginning to end. No way to select which cards you want to focus on other than manually flipping to them.

There are some smiley faces on top and one just guesses and then flip it to see the answers. It is in color if you have a color. Mine is on my paperwhite kindle so a little less flashy.

Awful app. My kids won't even touch it. Not Helpful. I want a refund.
