DK Eyewitness Books: Explorer

Synopsis

How did the earliest sailors navigate? Who crossed the Australian continent first? What did the Egyptians find in the "Land of the Gods"? DK Eyewitness Books: Explorer takes a look at the worlds of Amelia Earhart, Jacques Cousteau, Marco Polo and other famous explorers, sharing real-life photographs of their equipment and personal possessions, as well as objects they found. Readers will see arrows shot into Livingstone's boat, Spanish conquistadors gold, and insect specimens brought back by naturalist explorers and gain an understanding of the extraordinary explorations that helped shape our world today. The most trusted nonfiction series on the market, Eyewitness Books provide an in-depth, comprehensive look at their subjects with a unique integration of words and pictures. The story of exploration – from early expeditions to high-tech trips into space – is presented in vivid visual detail in this intriguing guide.

Grade Level: 3 - 7

Customer Reviews

Fascinating - inventive way to deliver history. ALL SCHOOL TEXTBOOKS SHOULD BE DONE THIS WAY. Kids would learn more, and love doing it! As a long time fan of DK's travel books I suspected this series would be delight-full. It did not disappoint. MORE, more, more! ! ! !

Adding to our child's mini science library. We gave our child the first book at age-5 (now 8).

Remember buy the most current revision that has the CD library attached at the right upper hand

corner of the book.

I Used This Book For A Unit On Explorers. It Is Colorful And Very Informative. The Students Enjoyed It Along With The Poster. DKseries Is Awesome!

My nephew was studying explorations and this came in handy.

They're museums in a book! The info may not be comprehensive but the photos really bring these people and times alive!

Used in my presentation, thanks

Excellent!

I was really impressed by this book on exploration. It takes exploration from the travels of the Phoenicians so many years ago right up to the current space exploration of today. It is very thorough and kids will get a better picture about exploration than they would normally get. I thought they would enjoy it very much.
