She also writes for several web sites including About.com. Sherril has previously turned her life experiences into two e-books: *How to Get a Life by Living and Working in a National Park* and *How to Break Into Casino Jobs*.

This book is great for those in the Reno/Tahoe area with dogs. The author has done her research and made it easy for the rest of us. Some information was out of date, but overall you can find good places to take your pet.

There's no map! It's frustrating to find hikes near you when there isn't a map. You have to look up each location and guess where it might be based off the distance from Reno. I hope the next edition has a map with the location of the climbs!

A Bark in the Park is a delightful book. Sherril Steele-Carlin covers everything you want to or need to know to walk with your dog in the Reno-Tahoe area, and provides good advice on walking with your dog anywhere. She begins by listing, among other useful items, some tips on physical conditioning, warns of a few hazards you may encounter, covers leash laws, and lists the contents of a first aid kit you should carry. Detailed descriptions include directions, a brief history of each park, and "Bonus" items, such as a visitor center, historic sites, or an off-leash area for dogs to enjoy. This is a wonderfully comprehensive guide to almost 100 places to hike with your dog.

I love to walk and hike with my dog, Maggie, and I'm always looking for new places to walk her in

Reno and Lake Tahoe. This book has been such a great inspiration -- I've found some new trails and rediscovered some old favorites as a result of picking up this book. I'd recommend it to anyone who loves to hike with their dog and is looking for some new trails, along with some old favorites they might have forgotten.

This book was great to have as I'm not that familiar with the Tahoe area. I only got to do three hikes listed in the book but they were amazing and I probably wouldn't have known where to go w/o this book. The only thing really missing from this book is a MAP! Otherwise well worth the money.
