The Uveitis section is a complete mess ! The pictures don't match up with the answers, they have included a corrections sheet but that's not even complete ! Someone should probably have enough

sense, that if you are printing a corrections sheet that has more than 50 mistakes on it, DON'T PUBLISH THE BOOK ! FIND A BETTER EDITOR ! But don't publish a book that is full of mistakes because you are cheap and lazy! Have some integrity !!!

very good question book for Part II

Excellent book! Thank you so much!

Very good if you are preparing for the EBO exams, the answers to the questions give you a lot of background knowledge but I would still recommend reading a textbook to put everything into a bigger context. I used it in combination with the review of ophthalmology by Trattler and that worked perfectly for me.

Pages were improperly inserted and there was an extensive errata sheet to go along with it.
