Product Dimensions: 8.6 x 0.3 x 11 inches

Shipping Weight: 13.4 ounces (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars 2 customer reviews

Best Sellers Rank: #1,006,637 in Books (See Top 100 in Books) #38 in Books > Engineering & Transportation > Transportation > Aviation > Helicopters #696 in Books > History > Military > Vehicles #1968 in Books > History > Military > Aviation

## Customer Reviews

Francis Crosby led the Marketing Department at the Imperial War Museum's branch at Duxford, England. He then established a marketing and business development consultancy, and works with visitor attractions as well as heritage and cultural organizations around the world.

I guess it's not a bad book for the price, although I paid the pre-release price of \$14 and now that I have received it I see I can get a new copy for \$7+\$4 shipping. Oh well. But the book itself is hardly the "complete history of army and navy helicopters..." that it claims to be. It's only 96 pages long counting the title page, contents page, glossary, and index. It does have a lot of glossy photos, many in color, but that just serves to keep the word count down. Also, inside the back cover it states that this book was "previously published as part of a larger volume, The World Encyclopedia of Military Helicopters." So the bottom line is that this is nothing new, and is about the equivalent of a really nice special edition magazine. If you are a serious student of rotorcraft history this is not for you. I guess it would be fine for a casual reader. By the way, I found at least one bookseller offering The World Encyclopedia of Military Helicopters for less than \$25. I probably should have gone that route, but after seeing this I doubt that book would add anything to my current collection of more authoritative books on the subject.

As described; used for a war documentary research project
