Butterworth Heinemann's Review Questions For The NBEO Examination: Part Two, 1e (Pt. 2)

Synopsis

Approximately 1,000 multiple-choice questions with explanatory answers prepare the reader to pass Part II of the national, state, or local boards, or obtain state licensure. Organized by topic, this resource follows the format and proportional question breakdown of the actual exam, helping the reader prepare effectively and efficiently for this challenging test. The companion CD-ROM provides further practice with 500 additional questions, answers, and rationales. 1,000 multiple choice questions with explanatory answers help readers prepare thoroughly for Part II of the national exam. CD-ROM includes 500 questions with answers and rationales, plus a quizzing function that allows readers to see their scores at the end of the tests. Wide margins are included for convenient note taking. Line drawings and photos are included both in the book and on the CD-ROM. Updated references in each section refer the reader to supplemental sources. Questions are authored by specialty experts and instructors at accredited U.S. optometry colleges.

Book Information

Paperback: 416 pages

Publisher: Butterworth-Heinemann (November 29, 2005)

Language: English

ISBN-10: 0750675667

ISBN-13: 978-0750675666

Product Dimensions: 9.1 x 7.3 x 0.6 inches

Shipping Weight: 1.4 pounds

Average Customer Review: 3.6 out of 5 stars 9 customer reviews

Customer Reviews

Overall, I found this review guide very helpful in preparing for the NBEO. As the product description says, the book is divided into sections following the same format and weighting as the actual exam: There are many more ocular disease/trauma questions than public health questions, for example. With each answer, there is a rationale explaining why that choice is correct, or why the others are wrong... this is awesome! One of the things I noticed was that the questions, especially in the systemic section, focused a lot on the nitty-gritty details. This made it really challenging and at

times, discouraging (which is why I gave 4 stars, not 5). However, after taking the test I felt (as did many of my classmates) that the questions on the actual exam tended to be slightly easier than the ones in the book, but that similar topics were covered. So -- even if you never actually sit down and do all the questions, this book will give you a good idea of what conditions/diseases, etc. to review. Good luck!

This review really helped prepare me for boards as a self-evaluation tool to determine which areas I needed to concentrate my studying. Most of the chapters were very concise and representative of the questions that appeared on the national boards. A few chapters did not give a good representation of the questions that actually appeared on the exam, but overall the questions were very similar to the types of questions were actually asked on the exam. Overall I would recommend the book to anyone who is preparing for boards and needs a little direction on which areas to emphasize their studying.

I have been out of the field for over 8 years. I've decided to get back into it. Studying at my age was difficult. I found this book on line and decided to give it a try. Loving this book. It makes studying so much easier to learn the materials. What helps too is that this book was compiled by a lot of my instructors when I was in school.

The book came with a chipped DVD and it does not work with Macs. PowerPC Apps do not open on Macs. Need a Fix.

good

I read the book from cover to cover and do feel more knowledgeable about what subjects I should study for Boards.

Out dated information - I took part 2 about 2 years ago. Not a good way to prep for part 2 boards. Stick with KMK part 2 or other resources.

I used this book almost exclusively in studying for part 2 of the boards. I would answer the questions from each section and if I scored below 60% on a section, I would read more about it in my optometry notes. My boards part two score was greater than 600 (300 is needed to pass)! I highly

recommend this book.
