# **Blackwell's Five-Minute Veterinary Consult Clinical Companion: Canine And Feline Infectious Diseases And Parasitology**

## Synopsis

Blackwell's Five-Minute Veterinary Consult Clinical Companion: Canine and Feline Infectious Diseases and Parasitology, Second Edition takes a user-friendly alphabetical format to cover a wide spectrum of canine and feline infectious diseases and parasite-related disorders. Part of the popular Five-Minute Veterinary Consult series, it includes information on many specific organisms and diseases, from amebiasis and Ehrlichiosis to rabies and ticks. The text also provides extensive differential diagnostic lists, as well as information on drugs, dosages, toxicity, treatment options, diagnostic testing, immunization recommendations, and cytological appearance. The Second Edition presents three new chapters on canine influenza, sarcoptic mange, and staphylococcal pyoderma. Blackwell's Five-Minute Veterinary Consult Clinical Companion: Canine and Feline Infectious Diseases and Parasitology, Second Edition is an ideal quick reference for veterinary professionals and students.

## Customer Reviews

“Apart from this, it provides a concise and valuable reference for small animal clinicians and a support for students developing an interest in infectious diseases and parasites.” (Veterinary Record, 25 May 2013) “This recently published book provides an excellent overview of all you need to know about dealing with “bugs”, from tiny (but deadly) viruses to tapeworms! . . . This book is also an excellent help for new graduates, who no doubt will appreciate the clear differential lists.” (Vet Nurses Today, 1 October 2012) “The

result is an in-depth at-a-glance reference highly recommended for any veterinary collection. (Midwest Book Review, 1 June 2012)

Blackwell's *Five-Minute Veterinary Consult Clinical Companion: Canine and Feline Infectious Diseases and Parasitology*, Second Edition takes a user-friendly alphabetical format to cover a wide spectrum of canine and feline infectious diseases and parasite-related disorders. Part of the popular *Five-Minute Veterinary Consult* series, it includes information on many specific organisms and diseases, from amebiasis and Ehrlichiosis to rabies and ticks. The text also provides extensive differential diagnostic lists, as well as information on drugs, dosages, toxicity, treatment options, diagnostic testing, immunization recommendations, and cytological appearance. The Second Edition presents three new chapters on canine influenza, sarcoptic mange, and staphylococcal pyoderma. Blackwell's *Five-Minute Veterinary Consult Clinical Companion: Canine and Feline Infectious Diseases and Parasitology*, Second Edition is an ideal quick reference for veterinary professionals and students. Key features

- Covers an extensive list of canine and feline infectious diseases and common parasitic disorders organized alphabetically by etiologic agent
- Designed for accessibility, with the most important information presented in concise, bulleted text
- Includes new chapters on canine influenza, sarcoptic mange, and staphylococcal pyoderma
- Makes clinically relevant information on both infectious diseases and parasitology in dogs and cats readily available to the clinician
- Offers an ideal quick reference for veterinary professionals and students

This is a great reference. It lays out infectious diseases, their symptoms, detection, and treatments, far better than many/most academic textbooks. It's well organized. Colors/pics are great and helpful. Highly recommended.

The book covered a lot of topics. However I was specifically interested in autoimmune diseases and their relationship to tickborne illness in golden retrievers.

I've gone through several iterations of Georgi's parasitology - always found it difficult to find what I needed quickly. This is a very handy reference - well organized, concise, easy to find the info you need quickly. Good companion to the more in-depth references like Greene's and Georgi's. I had Dr. Barr as a professor in school - the book is organized much like his lectures. He's great at getting to the bones of what you really need to know in general clinical practice.
