Jane's Avionics 2007-2008 (Jane's Flight Avionics)

Synopsis

"Jane's Avionics" contains detailed information on airborne electronic equipment for both military and civil aircraft, ensuring you stay up-to-date with the latest technological developments and new production lines. In-depth descriptions of fundamental technologies, including datalink, radar, electro-optic systems and helmet-mounted displays provide an invaluable aid to making critical procurement, training and commercial decisions. Each entry is arranged by country of manufacture and contains information on function, development history, technical description, specifications, operational status and contractor. This book contains colour images which facilitate quick assimilation and comparison of important design and layout characteristics. It includes comprehensive equipment and manufacturer indices which enables rapid data search and browsing of related entries.

Book Information
