Space, Time And Man: A Prehistorian's View (Canto Original Series)

Synopsis

Human understanding of time and space has been developing since the most primitive societies began to record an awareness of their history and environment. Grahame Clark, a distinguished prehistorian, describes that process and its extension with the emergence of technology, social organisation and the capacity for abstract thought. Moving from preliterate to civilised societies, he charts the various phases of transition, marked most notably by the growth of geographical discovery culminating in the circumnavigation of the earth, and the growth of a deeper, more critical view of human history. Our own period takes this fascinating account into the exploration of outer space and the search for an understanding of man's place in the cosmos.

Book Information

Series: Canto original series

Paperback: 184 pages

Publisher: Cambridge University Press (March 25, 1994)

Language: English

ISBN-10: 0521467624

ISBN-13: 978-0521467629

Product Dimensions: 5.4 x 0.4 x 8.5 inches

Shipping Weight: 4.8 ounces (View shipping rates and policies)

Customer Reviews

'Grahame Clark studies the human animal in a vast perspective of space and time, showing how the adventure of human exploration has shaped our understanding of the world and of our place in it. It is a remarkable survey, taking a broad sweep, and probably only Grahame Clark, author of *World Prehistory*, could have written a work so comprehensive in its scope.' Colin Renfrew
