Health Policy: Application For Nurses And Other Healthcare Professionals

Synopsis

Health care providers frequently engage in setting policy agenda at the individual, systems, institutional, or public level. *Health Policy: Application for Nurses and Other Health Care Professionals* provides an overview of the policymaking process within a variety of settings including academia, clinical practice, communities, and various health care systems. By including both policy evaluation and research, the author provides a comprehensive and multi-perspective approach to developing and formulating effective health care policy. Unlike other texts, *Health Policy: Application for Nurses and Other Health Care Professionals* utilizes a condensed format without a large amount of explanatory text. Topics include governmental overviews and roles, policy formulation and analysis, public health, political theory and practice, ethical perspectives, and policy institutes.

Customer Reviews

This book is a good resource if you want to understand the history and processes and politics behind U.S. health care policy. Its useful when you have to write papers about processes rather than about the policies themselves since some of these do change from time to time. It is useful in that it presents much of the information in one place so you don't have to go searching all over the place for it. But, if you don't mind spending the time you can research and obtain this same information for free online.

Easy to read, great information

Well design content with basic concepts to understand a new language in Health and Policy.

I need this book for a graduate class and the information is very through; great wealth of information and easy to understand.

This has up-to-date information and is easy to navigate. It met my needs during the course. I was able to use it for reference throughout the course.

Great item

IF you are already into politics, this is a waste of your time

It is a very comprehensive coverage of the government and how laws are made and the impact on the health care system.
