## Customer Reviews

I bought this for my homeschooled daughter and she loves it! I was not expecting the additional grammar lessons included in the book so that was a big plus! She is picking up on spelling, punctuation, subject/verb agreement that she was not getting before. Another added bonus is that she is able to pick out the mistakes in written compositions instead of just fill in the blank, circle the correct answer, or workbook type grammar instruction. This is a great bonus to any curriculum. I don't think I would use it exclusively for grammar, but paired with wordly wise and a solid writing program, I think this is great! An added caveat - there are references to the earth being created millions/billions of years ago. This might be a disappointment to the creationist homeschoolers out there.

This book is excellent! I use it with my 8th graders who have poor editing skills. Each page tells you exactly how many editing marks need to be made, which is very helpful to apprehensive editors. It is broken down by skill, which is great for differentiation in the classroom.

I bought this for my 6th grade daughter and it is challenging her on her grammar and spelling. I have her type up her corrected work. I will keep using these for my kids.

Love this addition to our already great English Grammar program. It is easy to just give him a page or two to edit and then we go over grammar rules together to cover the concepts. He is learning lots with this. Great item!

This book is truly helping my daughter become a better writer! It is like being a detective! LOVE IT!

Love this for my 8th grade daughter!

Excellent for fine-tuning editing skills!

My child is eager to work on this in his spare time.
