## Synopsis

I am not a book store or professional seller. These books belonged to my grandfather and all have his name written on the inside, as he loaned his books out and felt writing his name on the inside improved his chances of getting them back. All proceeds generated from the sale of his books goes to the Cleveland Clinic, where he worked for many years, as his dying request.

Excellent historical collection for any student of neurology. Very interesting case reports.

The book came in good condition. It has mild use. It's completely what I expected. The text reviews the classical brainstem syndromes in their ethyological context.
