Architecture Of Human Living Fascia: Cells And Extracellular Matrix As Revealed By Endoscopy (Book & DVD)

Synopsis

This unique book illustrates the structure of the fascia in the living human being. Dr Guimberteau's photographs provide a detailed account of fascial architecture. The accompanying text explains what the photographs mean, clarifies the importance of the fascia, and sets out the implications of these findings for everyday therapeutic practice.

Book Information

Hardcover: 204 pages

Publisher: Handspring Publishing; 1 Har/DVD/ edition (October 19, 2015)

Language: English

ISBN-10: 1909141119

ISBN-13: 978-1909141117

Product Dimensions: 0.8 x 8.8 x 11 inches

Shipping Weight: 12.6 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 12 customer reviews

Best Sellers Rank: #153,438 in Books (See Top 100 in Books) #72 in [Books > Health, Fitness & Dieting > Diseases & Physical Ailments > Musculoskeletal Diseases](#) #75 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Physical Medicine & Rehabilitation](#) #102 in [Books > Medical Books > Medicine > Internal Medicine > Physical Medicine & Rehabilitation](#)

Customer Reviews

Dr Jean-Claude Guimberteau is co-founder and scientific director of the Institut Aquitain de la Main, and past-President 2011-2012 of the French Society for Plastic and Reconstructive Surgery (SOFCPRE). Dr Guimberteau trained in hand and plastic surgery at the University of Bordeaux, under Professors Goumain and Baudet. He worked in microsurgery and transplantation, extending his surgical experience through working in the USA with Dr J M Converse and Dr Ralph Millard. With Professor Claude Verdan in Switzerland and Dr Harold Kleinert in the USA he wrote a book: *New ideas in hand surgery*. He has developed our knowledge of the structure and function of tendon physiology, and pioneered techniques for secondary flexor tendon repair. Perhaps his most significant contribution to our understanding of human biology has come about through his innovative use of video-endoscopy to investigate the structure of the fascia in vivo, resulting in what is essentially a new concept of living tissue and a new ontology for human body architecture. Through the company endovivo.com he has published many videos on living matter: *Strolling under*

the skin, 2005; Skin excursion, 2008; Muscle Attitude, 2009; Interior Architectures, 2011; Skin, Scars and Stiffness, 2012; and Destination Tendon, 2012 Dr Guimberteau is also a member of the French Hand Society (GEM), and of the French Academy of Surgery. He has been a member of the (French) Health Service High Authority 2007-2010.

This content is beyond reproach. Finally a book that I can study of our human form that is congruent with what I have felt in my hands as a practitioner for 30 years. Thank you

Fantastic photos of living fascia and everything it touches. a clear presentation of the function of fascia.

Wow----an amazing book. Seeing the invisible that is part of us and that seems so hidden from us.

This book is beautifully written and the photographs are phenomenal.

An in depth look into the infinite three dimensional fascial system of the body. Amazing

Inform your practice the day after you read this book. Then try the videos! Is that the sound of my head exploding that you are hearing?!

This book gives great insight into an area of study that I hadn't really focused on. The pics are amazing and helps to explain concepts and function quite well.

Amazing pictures and information. Love it!!
