Principles Of Avionics - 9th Edition

Synopsis

New Edition of the most widely-used engineering text on avionics Written by an eminent professor of avionics, Dr. Albert Helfrick of Embry-Riddle University, this book includes every communication and navigation system, plus the latest spaced-based avionics. The text describes navcom, transponder, VOR, ADF, DME, TACAN, instruments, radar, autopilot, collision avoidance and enhanced ground proximity warning. The book also covers recent systems; Mode S, electronic displays, Free Flight, GPS space and earth segments, laser gyro's, fiber optics and avionics architectures. Principles of Avionics is the most timely book on avionics now available. This edition introduces a new chapter on the most important concept now affecting avionics; Performance-Based Navigation and Required Navigation Performance. Dr. Helfrick explains how avionics, once discussed as separate systems, are now viewed as components in a much larger infrastructure for air traffic management. He describes the technical requirements affirmed by ICAO (International Civil Aviation Organization). The author describes the theory of each system with figures, photos, problems and solutions. Over 150 graphics illustrate basic principles. Dr. Helfrick is also well-known as an avionics test equipment designer, consultant to FAA, and frequent speaker at the Digital Avionics Conference. In his teaching role at Embry-Riddle Aeronautical University, Professor Helfrick's students are in 2- and 4-year engineering programs. He wrote this book to meet a longstanding need for a text and reference for anyone needing to know the latest theory and practice behind airborne electronic systems.

Book Information

Paperback: 533 pages

Publisher: Avionics Communications Inc.; 9th edition (July 23, 2015)

Language: English

ISBN-10: 1885544359

ISBN-13: 978-1885544353

Product Dimensions: 1.5 x 8.5 x 10.8 inches

Shipping Weight: 4 pounds (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars 1 customer review

Best Sellers Rank: #226,609 in Books (See Top 100 in Books) #1 in Books > Engineering & Transportation > Engineering > Aerospace > Avionics #129 in Books > Textbooks > Engineering > Aeronautical Engineering #334 in Books > Science & Math > Astronomy & Space Science > Aeronautics & Astronautics

Customer Reviews

Written by an eminent professor of avionics, Dr. Albert Helfrick of Embry-Riddle University.

Great reference with enough detail on avionics principles.
